Lindita Hamidi

Profile

SQL Developer with several years of experience developing BI solutions in the financial industry. Skilled in SQL Server Reporting Services (SSRS), T-SQL, SQL, Report Designer, Kendo, Power BI, R Script, Python, HTML, JavaScript, and Cascading Style Sheets (CSS). Strong information technology professional graduated from the University of Pristina. Experienced in working with high-load database systems.

- Teaching Assistant with 5+ years of experience
- SQL Developer, Data Analyst, and BI Specialist with 3+ years of experience.

Education

Master Studies in Cumputer Engineering (MSc. Cand.)　　　　　**Oct 2013 - Present**

University of Pristina "Hasan Prishtina", Faculty of Electrical and Computer Engineering, Pristina

- Master's Thesis Title: "*Implementation of interactive interfaces for real-time data generation to increase the performance of electronic services at the University of Prishtina*"

Bachelor of Science in Computer Engineering (BSc)　　　　　**Oct 2009 - Oct 2013**

University of Pristina "Hasan Prishtina", Faculty of Electrical and Computer Engineering, Pristina

Employment

SQL Developer　　　　　**Dec 2019 - Present**

Mikrobiz SHPK, Pristina

- Designing database tables and structures
- Develop, maintain and optimize complex T- SQL queries, stored procedures, functions, triggers, views;
- Database design and query optimization - re-writing complex queries to achieve the minimum possible runtime;
- Perform and execute data extraction, transformation, and loading;
- Write ad-hoc queries, stored procedures, SQL Agent Jobs, and functions to support the development and management teams
- Troubleshooting and technical debug using SQL Profiler;
- Develop complex reports and statistics in reporting services platform – SSRS, Telerik, Power BI;
- Work with other SQL developers to develop and extend data warehouse modeling to provide flexible and efficient access to information
- Assist with development efforts to define and automate data gathering, analysis, and reporting processes
- Assist the reporting group by developing complex and advanced level visualizations and financial reports.
- Reports access management - users and group access rights management, manage SSRS reports subscriptions;

- Power BI Reports - Develop self-service models, data analytics using Power BI service (Dashboard, DAX language);
- Support and maintenance
- Resolve technical problems.

Projects:
- **GovBooks Software** - DCAA (Defenses Contract Audit Agency) software that integrates with QuickBooks. It is simple and easy to use, affordable and powerful. A scalable, large enterprise, SAAS cloud application with roles and permissions, project management, reports, and dashboards. GovBooks is the registered service mark of the United States Patent and Trademark Office owned by Govcon Accountants LLC.
  - **Technologies used:** ASP.NET MVC, SQL Server, Kendo, jQuery, HTML5, JavaScript, Bootstrap, Report Service Telerik

- **Govcon Cloud Services** - providing secure collaboration for companies including government contractors that use QuickBooks Desktop. Govcon Cloud Services is a custom hosting solution for QuickBooks Desktop. Connect the version of QuickBooks Desktop to over 150 accounting and business applications available at Govcon Cloud Services. Connect to any cloud storage vendor, like Dropbox, Box, Google Drive, or OneDrive. I take care of firewalls, backups, hardware, and software upgrades.
  - **Technologies used**: Azure, QuickBooks Desktop

- **ITAMIS** "Integrated Tax Management Information System" (**Reporting Module**) a project is developed for TAX (Tax Administration of Kosovo). The module is aggregating risk-related information from different sources and will show them via personalized dashboards. The module will have automatically generated standard-reports format along with the reports created through ad-hoc queries. Thus, in the first iteration, the ITAMIS will provide standard reporting tools built into the application. The reports are incorporating all necessary information for the Risk and Audit process's successful implementation by corresponding TAK officials. Reports inter alia are including data about taxpayers' activities such as the amount of turnover, losses, advance payments, etc. Any given report, using the drag-and-drop functionality, can be disaggregated by tax account type, type of taxpayers, regions, sectors, size of businesses, type of enterprises, etc. providing information in the quantitative form and enabling comparative analysis per given parameter. In this project, I am engaging as BI Developer.
  - **Technologies used**: SQL Server, Power BI Service, Power BI Desktop, Power BI Embedded

Teaching Assistant   **Nov 2013 - Jan 2019**
ILIRIA Collage, Pristina
• Teaching Assistant for subjects
- Discrete Structures
- Calculus and Linear Algebra
- Digital Circuits Technology
- Databases
- Artificial Intelligence
- Algorithm & Data Structure

• Researching on different subjects and submitting the research papers to registration, and placement activities.
• Preparing and delivering lectures to undergraduate and graduate students

on topics such as programming, data structures, and software design.
• Preparation of tests for students and keeping assists
• Preparing teaching material and utilizing it for the progress of students.
• Helping the professor for creating the material for students
• Managing the class of students in absence of the college professor as
well as motivating students for having desired effects.
• Providing a guide to the students for developing their career as
well as making them familiar with different career opportunities.
• Planning, evaluating, and revising curricula, course content, and course
materials and methods of instruction.
• Utilizing the skills and qualities by assigning work to the students.
• Helping the students for completing their project works

Preparation of. Master's Thesis

Research Project - Diploma Thesis   **Feb 2018 - May 2018**
IT Office (University of Pristina)
Preparation of. Master's Thesis (Research Project).
I have presented the BSC model which applies along with BI tools such as
Power BI for design and implementation dashboards, analytical charts, and
performance measures at the University of Pristina (UP). University data was
organized and stored in an Electronic Student Management System(ESMS)
database and I managed with SQL queries to retrieve data for the dashboard.
Please "Click" (drag-drop) in links to have full details for some dashboards.

Internships

Software Developer   **Jul 2013 - Oct 2013**
PBC, Pristina
Projects: "*Vehicle Registration Systems*"

Vehicle Registration System, a project developed for the Ministry of Internal
Affairs.

Project objectivities:
  • Establishing new Vehicle Registration Systems
  • Maintaining the Vehicle Registration Systems

Technologies used:
  • ASP .NET MVC
  • SQL Server
  • HTML5
  • CSS
  • jQuery
  • JavaScript

Courses

Python Programing   **Present**
ICT for Kosovo's Growth

MongoDB – The Complete Developer's   **Jul 2021**
Guide 2020
Udemy

Certificates

Wordpress Fundamentals   **Jul 2017**
SmartCode Training

Web Developer, SmartCode Training   **Jan 2017**
frontEnd (HTML, CSS, JavaScript and
jQuery) backEnd (PHP, Laravel and MySQL)
SmartCode Training

Introduction to Cybersecurity   **Apr 2016**
Cisco Networking Academy. A•U•K

#EcShlire   **Feb 2016**
EcShlire project Girls Coding Kosova together with Open Data Kosovo and
Kosovo Women's Network Canada Fund for Local Initiatives, USAID, Ministry
of Labour and Social Welfare, and R.I.T./A.U.K.
