Letter of recommendation

DATE: 26 August 2019

Dear Mr / Mrs

Astrit Kurtishaj, Employee worked for us as internship a software developer from 1 June 2019 to 25 August 2019. He was a part of Development Team, he wrote code for computer software. His responsibilities included requirements gathering, analysis and design of complex Web applications using a variety of technologies like (HTML5, CCS, JavaScript, jQuery)

During the course of his internship, he proved himself to be a dependable employee and a hard worker with solid problem solving and technical skills. I was always impressed by his ability to complete the work assigned to him on time. He, not only met deadlines but also explains his programs in a way that non-experts can easily understand. This skill came in handy when he presented his programs to our clients who weren't particularly tech savvy.

Mr. Kurtishaj takes his work very seriously and regularly enrolled in classes to stay abreast of the newest developments in programming. Although he is a fast-learner, he is very careful and cautious about his work. That means he repeatedly runs checks on his programs (and others) before making them public to ensure there aren't any hiccups.

Mr. Kurtishaj would be an asset to have on any team. To say he's a team leader would be an understatement, he is and can be much more than this and he proved it every day while his tenure at our company, he's gone out of his way to welcome newcomers and resolve any problems they might have.

Sincerely,

Herolind Sopjani
