Software Engineer Detail oriented, professionally set up and very good relations with collaborators. Able to work in environments that require responsibility. Analytical, problem-solving and flexible skills in life. Ready to work with collegial groups, to deal with different situations and personalities. Friendly, easily adaptable to work environments. I see development in the field of software engineer starting as an internship programmer and gradually increasing in career. Curious and combative for increasing intelligence.

Experience

09/2021 to 12/2021

Support IT Service Specialist full-time, Prishtinë

- I supported IP Petrol outlets by fixing their technical problems remotely via AnyDesk. Then in the field I changed the devices such as houses, monitors, mice, keyboards, etc., as well as the configuration of printers and scanners.
- Formatting office computers as well as preparing new computers with all the necessary applications that had to be installed to operate a point including ssd replacement by removing old computers from the points and replacing them with new ones.

05/2016 to 08/2017

Web Designer full-time, Prishtinë

- I have created for 1 year more than 20 websites with the ECD Builder platform such as. personal website, portal websites, portfolio websites etc.

09/2017 to 09/2020

Social Media Manager full-time , Prishtinë

- I have been dealing with online sales, with the increase of facebook pages, instagram accounts, comic accounts, advertisements, increase of groups on facebook, distribution of free posts without using paid facebook marketing, etc

Trainings

2017 to 2022

ECD Builder: Trained to build website with Drag and Drop with a specific software ECD Builder.

Machine Learning AI: It was a short training when we saw some examples offered by Microsoft Azure Machine Learning Studio.

Java Mobile Application Development ICT Kosovo: We have gained knowledge in programming oriented to java oop objects and we have used technologies such as intellij, MSQ Server with which we have built mini-applications according to Java Spring Boot.

IT Project Management: It was more like motivational training that lasted 2 days out of two hours when we learned about the importance of the CV for as well as the beneficial stages that a programmer faces during the creation of his career.
