Experience

Mechanical Engineering - 09/2017 - Present
Fabrika e Veglave Plus Aparateve Elektrike SH.P.K, Ferizaj

- Initially worked as an intern for 1 year where during this time I gained knowledge about the work process in general.
- Designed various details which the factory accepted as a custom after 1 year where I managed to become a professional in measuring old parts by constructing them to produce the new model.
- I learned from the relevant engineers how different tools work such as: cutting tools, cutting curves, bending tools, plastic molding tools (injection).
- Knowledge and experience to construct from some simple tools to the most complicated one and achieved a high success in the construction of tools, such as tools for cutting tools, bending tools, tools with injection.
- Knowledge to construct different machines
- Knowledge and experience to working with groups about mechanical engineering
