SUMMARY

Computer Science and Engineering Student with high proficiency in JAVA, .NET Core, React js, Javascript, CSS, and HTML. Passionate about implementing and launching new projects. Ability to translate business requirements into technical solutions. The communication skills, willingness to learn attitude and team player mentality round up my profile.

PROJECTS

Rental Microservices
📅 Ongoing
🔗 https://github.com/asalihaj/rental
A Car Rental & Management System using microservices. It will allow companies to manage their cars, employees, payments, will show statistics and reports about performance in different time periods.

Orion
📅 05/2022
🔗 https://github.com/asalihaj/orion
Creation of an online platform for posting job offers. Companies can post their job offers and find matching candidates. Also, job seekers have the option to apply to offers published by companies.

Text Summarizer
📅 02/2022
🔗 https://github.com/asalihaj/TextSummarizer
A small project for summarizing large texts. While it may not provide the best outcome, this project was developed to demonstrate OOP principles and design patterns.

Car Rental (Database Design & Implementation)
📅 04/2021
🔗 https://github.com/asalihaj/car-rental-database-design
A relational database design and implementation of a car rental business.

Car Rental Website
📅 02/2021
🔗 https://github.com/asalihaj/car-rental
A simple website for companies to post their services and clients to book cars. It includes (for companies) managing cars and reservations.

Game of Life
📅 09/2020
🔗 https://github.com/asalihaj/game-of-life
One of my earliest solo projects, a simple GUI project of Conway's Game of Life. It is developed using basic OOP principles.
