PERSONAL PROJECTS

01.05.2023 – 01.10.2023   **On-Demand Home Services Web App**

An innovative web app, where I have integrated multiple features, a user can interact with such as: flexible scheduling service reservation, payment simulation, invoice generation (PDF), giving reviews etc.

Interchangeably I have provided user-friendly pages, and optimized server responses.
Technologies used: NodeJS/Express, ReactJS and MSSQL.
Three different privilege levels are available: Customer, Employee and Admin.

29.11.2023 – ongoing   **Photo-Album App**

In my continuous efforts to leverage my skills and earn new ones, photo-album app idea came to mind and started to design a creative way to post, save, view, and download photos in certain albums, which users have the right to add.

User-interface is my main target in this project, so a user easily can use in any device providing a responsive view.

Technologies used: NodeJS/Express, ReactJS and MSSQL.

HONORS & AWARDS

Winner of Data Hackathon 2023, powered by Raiffeisen Bank.
