Pristina, Kosovo

## PROFILE

I am Abit Hyseni, a passionate full-stack developer and computer science bachelor's student at the University of Pristina. With experience working across diverse companies worldwide, I strive to create impactful technology solutions that drive positive change. Programming has been a transformative journey for me, and I'm excited to continue growing in the field, building innovative solutions that make a difference.

## WORK EXPERIENCE

### Innovation Company

#### Hybrid Intern (unpaid) Pristina district

2020 - 2021

- I had the opportunity to work as an intern for 10 months at Innovation company, where I dedicated my time without compensation to advance my career. This experience allowed me to collaborate closely with both front-end and back-end teams, gaining hands-on experience in fetching APIs, working on real-time websites, and utilizing tools like Git, GitHub, and Jira in remote and hybrid environments. I was officially certified as a Front-End Developer by the company.

### Innox Software development tech

#### Germany, Hamburg

#### Front End developer

2022-2024

- At Innox Tech, I was very comfortable working as a React developer, where I handled various tasks, including APIs, components, hooks, CRUD operations, and props. The work aligned well with my skills, and I was able to make strong contributions to the team. I also had the opportunity to work remotely, which was an ideal setup for me.
