

OVERVIEW

PHP/Laravel Developer

I am an enthusiastic and hard-working junior developer. Having an educational background in Computer Engineering and working in different projects helped me to become a decent PHP/Laravel developer and fast-learning any new technologies. My experience working in two different companies has turned me into a great team-player as well as using my own initiative. Furthermore, I am able to work well under pressure and adhere to strict deadlines.

WORK EXPERIENCE

IT Support Engineer

KEDS Energy
