#### Pizza Maker

April 2015 - September 2015

##### Restaurant Shaqa - Gjilan

Every season I change restaurants to explore and to test my skill in pizza maker.

## LANGUAGES

English - Intermediate

my last job in pizza maker was here in restaurant Shaqa in Gjilan (Kosovo) in 2019 in summer season. I don't work more in pizza maker from 2019.

**Pizza Maker** May 2012 - September 2012

**Planet - Gjilan**

In Restaurant Planet i was work same position in cooking pizza maker for summer season.

**Chef Pizza** April 2008 - September 2008

**Ulqin - Ulqin Montenegro**

In montenegro i was working in summer season for 6 month.  
my position here it was the same like bambus pizza maker.

**Pizza Chef** June 2005 - March 2008

**Bambus - Gjilan**

In Restaurant Bambus i started to work after i finished the craft in Pizzeria Diablo.  
and here i worked for 3 year. my position here was pizza maker chef.

**Pizza Maker Assistant** September 2004 - May 2005

**Diablo - Gjilan**

In 2004 after i finish my high school i started to learn in cooking for pizza maker.  
After 1 years and 6 month i finished practice and i change position.

## EDUCATION

**Completed apprenticeship/training** 2022

**ICT KOSOVO, Cyber Security - KOSOVO**

In this Trainig i learned to use tools for Security reason, for ex.  
Tools.

- Whatweb
- Whois
- wafW00f
- SQL injection
- Dirb
- Maltego
- Recon-ng
- theHarvester
- Nikto
- WPscan

**Completed apprenticeship/training** 2021

**Udemy, Website Hacking Penetration Testing/ Bug Bunty Hunting - Online**

In this Training i learn to much about installing from zero for example VMware, Virtualbox, Metasploit, KaliLinux, Windows For Penetration Testing.

Right now i have good experience in loot of tools in kali linux.

For Example.

- Maltego - Discovering Servers, Domains & Files.
- Maltego - Discovering Websites, Hosting Provider & Emails.
- How To Discover & Exploit Basic File Upload Vulnerabilities to Hack

- Websites.
- GET & POST Requests.
- Exploiting Advanced File Upload Vulnerabilities To Hack Websites with BrupSuite.
- ZAP
- SQL Injection.
- XSS vulnerabilities
- Post Exploitation Introduction
- Veil Framework

I always use a Local network to attack (penetration) i mean i created a database with metasploit for penetration, the same way i use and windows to penetration with veil framework for backdor.

**High School in IT infomation technology** 2021

Andrea Dursaku, Information Systems - Kamenice

**Completed apprenticeship/training** 2021

Cisco, Cybersecurity - Online

**CCNA** 2016

InfoTech, Network - Gjilan

In march 2016 i was started to learn in Cisco Certificate Network Academy in Kosovo , City Gjilan.

I finished 4 Level in CCNA but i'm not certified at last exam.

We finish the training in june 2017.

**High school** 2004

Zenel Hajdini, Mathematics and Informatics - Gjilan
