

# Lum Gashi

I'm a MERN Stack developer and enthusiastic about web development and algorithms. I've participated in ICT training, Java Application Developer & Web Application Development. I continued to learn new technologies such as Javascript and React.js. While I got better at it, I continued to use the skills I gained on different personal projects.

## PROJECTS

---

### eCommerce — [lumgashi/e-Commerce-MERN](#)

Dec 2022 - <https://github.com/lumgashi/e-Commerce-MERN>

This is a web application that allows users to browse and purchase products online and also allows admins to manage the products and orders. The application is built with the MERN stack, using React and Redux Toolkit on the front end, Stripe for payment, and Socket.io for real-time notifications. The backend is built with Node.js and uses Postman for testing and MongoDB as the database.

### Chat — [lumgashi/mern-chat](#)

Dec 2022 - <https://github.com/lumgashi/mern-chat>

This is a simple real-time chat web application where users can communicate with each other privately or in public chat rooms. The chat rooms available are about crypto, general, tech, and finance. The application is built with the MERN stack & Socket.io

### Twitter Clone — [lumgashi/twitter-clone](#)

Nov 2022 - <https://github.com/lumgashi/Disney-clone>

This web application is a simple clone of Twitter. The user can log in, follow & unfollow and have a feed with posts made by other users. It's made with MERN Stack.

## EDUCATION

---

### Shkenca Kompjuterike dhe Inxhinieri — UBT

OCT 2019 - OCT 2022

## TRAININGS & COURSES

---

### Java Application Developer — Kosovo ICT Support

A training course about Java, starting off with Java basics, OOP, Collections, and Database Connectivity, intensive training with around 300 hr training, providing me with much-needed knowledge in Java programming.

### Web Application Development Professional — Kosovo ICT Support

A training about Java scripting and Framework training for UI and backend.

### React Complete Guide — Maximilian Schwarzmüller

A whole course from which I've learned React.js, React components, hooks, etc from scratch.

### Full Stack Open — University of Helsinki

Full Stack Open by the University of Helsinki is one of the best Full Stack React Development courses on the internet. This course teaches you how to build modern web applications with JavaScript centering around building single-page applications with React that use REST APIs built with NodeJS.

## SKILLS

---

- Leadership
- Problem-Solving
- Teamwork
- Creativity
- Communication Skills
- Time Management
- Fast Learner
- Decision-Making

## TOOLS & TECHNOLOGIES

---

Tools: Trello, Github, Chrome DevTools, Postman, npm.

Skills: Programming, Data Structures & Algorithms, REST API.

Technologies: Java, Javascript, Node.js, Express.js, React.js, Redux/Toolkit, React-router-dom, MongoDB, Mongoose, JWT, Bootstrap, CSS, HTML.

## LANGUAGES

---

Albanian, English.

## INTERESTS

---

Playing sports, video games, reading manga, and learning new technologies.
