🎓 EDUCATION

Bachelor degree in Software Engineering

FIEK, Hasan Prishtina

10/2021 – 10/2024 | Prishtina, Kosovo

🧠 SKILLS

Backend

JAVA | C++ | PHP | Python

Frontend

HTML, CSS, Javascript, jQuery, Bootstrap

📁 PROJECTS

Beale cipher algorithm

Implemented a Python script for Beale cipher encryption and decryption, showcasing proficiency in cryptography and algorithmic problem-solving. The project involves generating a key from a specified book, encrypting a given plaintext, and decrypting a provided ciphertext.

Encrypted Chat

Developed a secure chat application using Python, implementing RSA encryption for confidential communication. Proficiently handled network sockets, threading, and GUI development with Tkinter.

Movies website (front-end)

Implemented responsive design for seamless browsing on all devices. Integrated dynamic features like search and content loading using HTML, CSS, and JavaScript. Delivered an aesthetically pleasing platform for film enthusiasts.

Movies website (back-end)

Developed a dynamic movie-centric website with a user-friendly interface using PHP. Ensured seamless browsing across devices through responsive design. Integrated interactive features like search and dynamic content loading.
